Exploratory testing

Chadi Kalousdian

1. Bugs

Bug 1: PowerPoint freezes when inserting snippet from Cloud/Team

Description:
Attempting to insert a snippet from the Saved Snippets → Cloud/Team section causes PowerPoint to freeze and become completely unresponsive.

Steps to reproduce:

1. Open powerpoint.
2. Navigate to the auxi tab.
3. Open the Assets panel using the insert templates button (or any button in the insert area).
4. Go to Saved Snippets → Cloud/Team.
5. Click on any snippet to insert

Expected Result:
The snippet should be inserted smoothly without affecting application performance.

Actual Result:
PowerPoint freezes and becomes unresponsive, requiring a restart.

Severity:
Critical

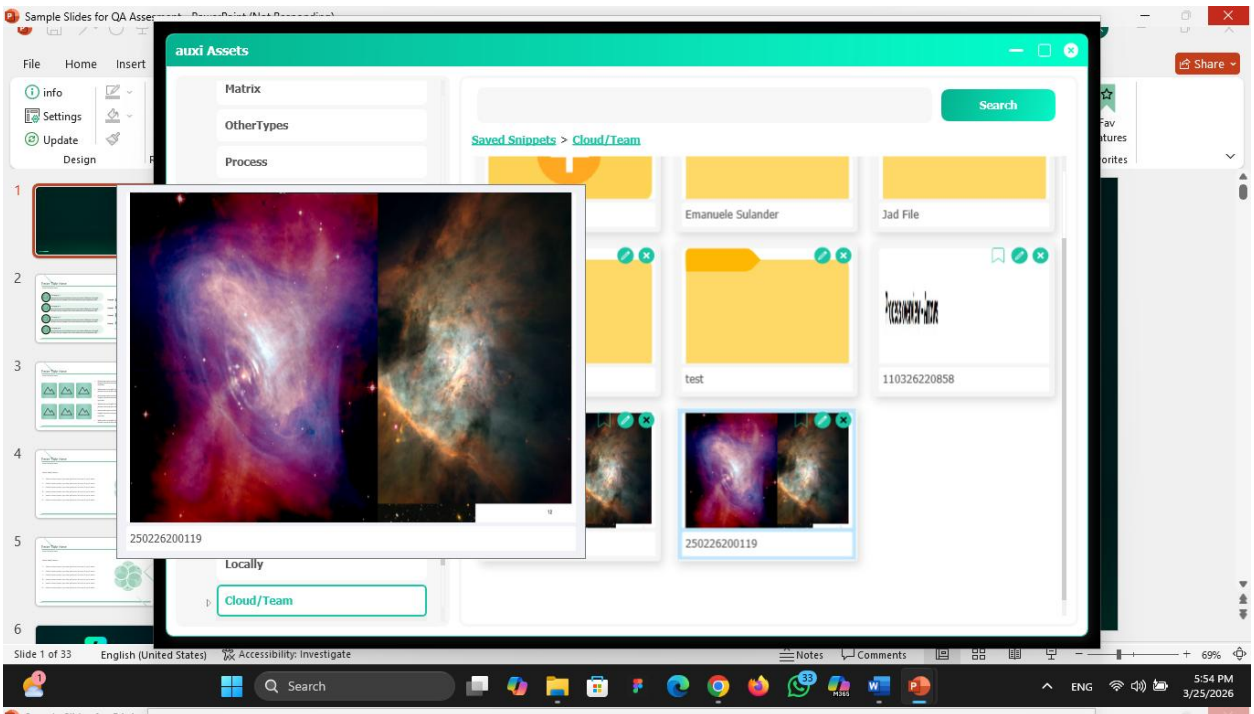
Impact:

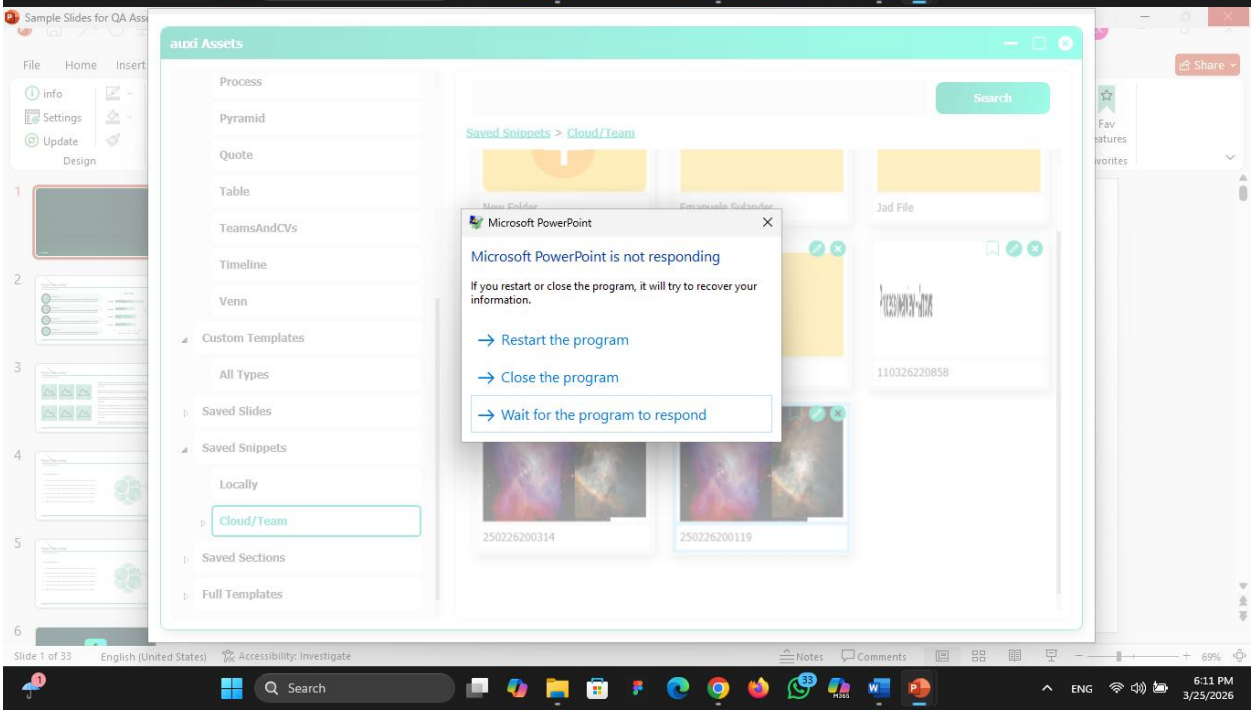
- Completely blocks user workflow
- Requires restarting the application
- Risk of losing unsaved work

Notes:

- Reproduced 3 times across different sessions
- Occurs specifically in Cloud/Team snippets
- Other features function normally

Screenshots:





Bug 2: Table layout breaks for specific table types after translation to Arabic

Description:
When translating slides from English to Arabic, certain table layouts experience formatting and structural changes, while other table types remain unaffected.

Steps to Reproduce:

1. Open a slide containing a structured table
2. Use the Translation feature (English → Arabic)
3. Compare the translated slide with the original

Expected Result:
Table structure and formatting should remain consistent after translation.

Actual Result:
Specific table layouts become misaligned and visually altered, while simpler tables remain unaffected.

Severity:
High

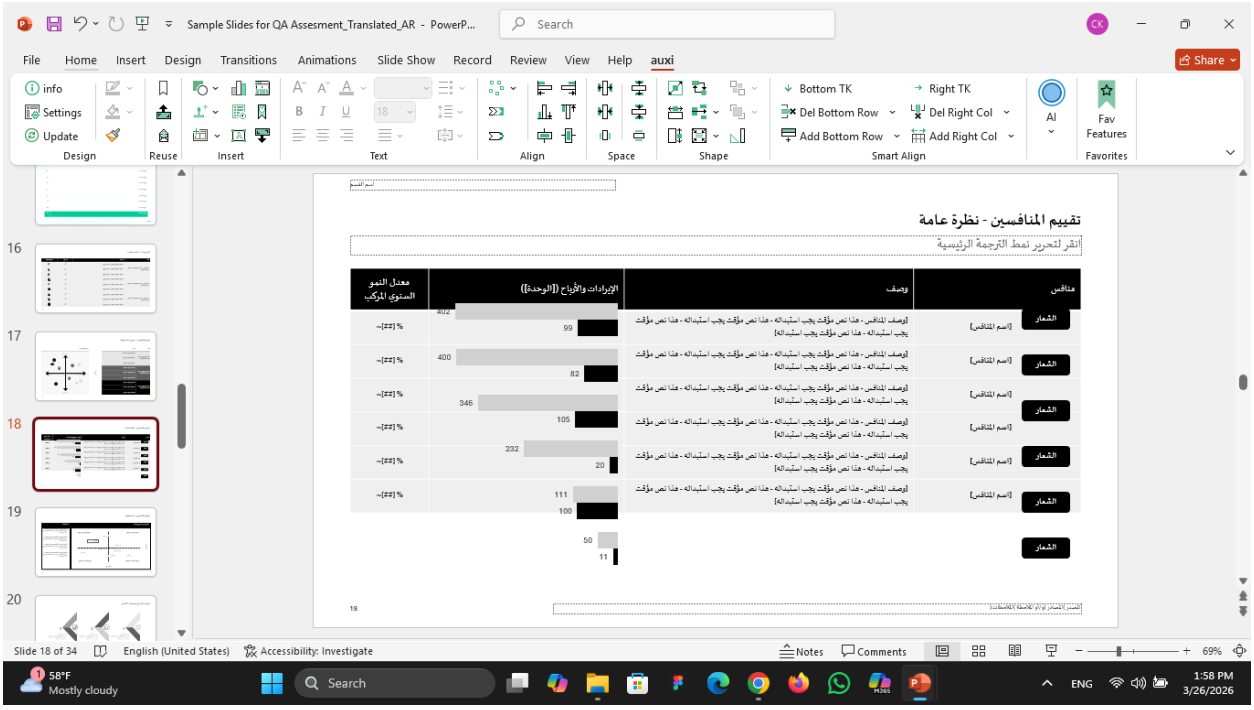
Impact:

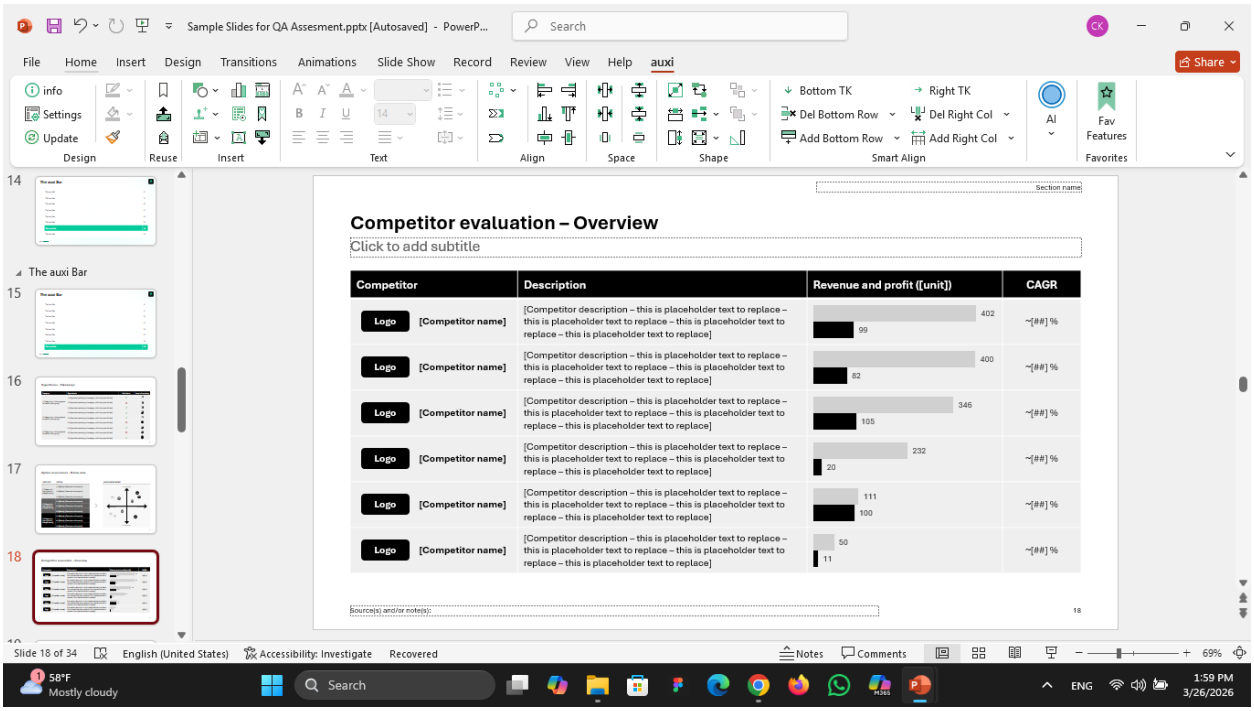
- Breaks visual consistency
- Requires manual correction
- Reduces trust in translation feature

Notes:

- Likely related to right-to-left (RTL) formatting handling
- More complex tables are more affected

Screenshots:





Bug 3: Agenda does not update when navigating between slides until hovered

Description:
The Agenda panel does not update when switching between slides unless the user hovers over it.

Steps to Reproduce:

1. Open Agenda
2. Navigate between slides
3. Observe Agenda panel
4. Hover over Agenda

Expected Result:
Agenda should update automatically with slide changes.

Actual Result:
Agenda only updates after hover interaction.

Severity:
Medium–High

Impact:

- Breaks synchronization
- Can confuse users
- Slows workflow

Bug 4: “Design and Divider Slides” button is not clickable despite appearing enabled

Description:
The button appears active but does not respond to clicks.

Steps to Reproduce:

1. Open Agenda
2. Click “Design and Divider Slides”

Expected Result:
Button should trigger its function.

Actual Result:
No response occurs.

Severity:
High

Impact:

- Blocks feature usage
- Misleads users due to incorrect UI state

Bug 5: Minimize button minimizes entire PowerPoint instead of auxi assets window

Description:
Clicking minimize on the auxi assets window minimizes the entire PowerPoint application.

Steps to Reproduce:

1. Open auxi Assets
2. Click minimize

Expected Result:
Only auxi window should minimize.

Actual Result:
Entire PowerPoint is minimized.

Severity:
High

Impact:

- Disrupts workflow
- Unexpected behavior

Bug 6: Lag when scrolling through templates and asset lists

Description:
Scrolling introduces noticeable delay, especially when scrolling quickly.

Steps to Reproduce:

1. Open Assets
2. Scroll through templates

Expected Result:
Smooth scrolling.

Actual Result:
Lag and delayed loading.

Severity:
Medium

Impact:

- Slows navigation
- Reduces usability

2. Enhancements.

Enhancement 1: Improve discoverability of Assets panel

Description:
There is no clear or direct way to access the Assets panel without using insert-related actions.

Impact:

- Confusing for new users
- Slows workflow

Suggestion:
Add a dedicated “Assets” button.

Enhancement 2: Temporary slide appears when saving snippet

Description:
A slide briefly appears during snippet saving.

Impact:

- Visually distracting
- May confuse users

Enhancement 3: Brief flicker of empty slide when opening Agenda

Description:
An empty slide briefly appears when opening Agenda.

Impact:

- Minor UI distraction
- Reduces polish

Enhancement 4: Content direction option shown for left-to-right translations

Description:
Content direction option appears even when translating to LTR languages.

Impact:

- Unnecessary confusion

Suggestion:
Show only for RTL languages.
